

BIJAN POURAZARI

Senior Software Engineer | Full-Stack .NET / Angular | AI-Enabled Development

(949) 572-3973 | bijan.pourazari@gmail.com | Rancho Santa Margarita, CA 92688

Authorized to work in the US

PROFESSIONAL SUMMARY

Full-stack software engineer with 10+ years of experience building and maintaining business applications across Angular, ASP.NET / ASP.NET Core, C#, SQL Server, mobile applications, and cloud-backed data workflows. Strong communicator who enjoys turning ambiguous product and technical problems into maintainable software. Background includes enterprise web applications, legacy modernization, API development, front-end architecture, data access layers, unit testing, and practical use of AI-assisted development workflows.

CORE SKILLS

Engineering

Full-stack development

Software architecture

Debugging

Unit testing

Microservices

APIs

Front End & Mobile

Angular

AngularJS

TypeScript / JavaScript

HTML5 / CSS

Android / iOS

Swift / Xamarin

Back End, Data & Cloud

C# / ASP.NET Core

ASP.NET MVC / WebForms

SQL Server / Stored Procedures

Entity Framework / Dapper

Azure / Azure Blob Storage

AWS / Docker

PROFESSIONAL EXPERIENCE

Software Engineer

Premier Crop Systems | November 2020 to Present

Develop and maintain Angular front-end features, C# Web APIs, backend services, SQL stored procedures, and data workflows for agricultural software systems supporting enterprise customers and internal business operations.

Work across the application stack, including Angular unit tests, C# unit tests with Moq, Dapper-based data access, SQL Server, data warehousing, and Azure Blob Storage.

Support maintainable software design by balancing front-end usability, API behavior, database performance, and long-term service reliability.

Contribute to customer-facing systems and internal workflows that supported **10% year-over-year revenue growth for four consecutive years**.

Software Developer, Independent Contractor

Provenza Floors — Tustin, CA | July 2013 to October 2020

Developed and released native Android and iOS applications, including dynamic homepage rendering from cloud-hosted JSON data in Google Cloud.

Integrated Firebase, Google Cloud Storage, Google Maps API, app notifications, retailer-location search, driving directions, and offline content storage.

Built and maintained ProvenzaFloors.com using ASP.NET MVC, Razor pages, AngularJS, ASP.NET Web API, JavaScript, HTML, CSS, and XML.

Converted HardwoodGalleria.com from legacy ASP master pages to ASP.NET MVC; implemented routing, bundling, shared layout structure, contact functionality, newsletter functionality, specials pages, and AngularJS-driven features.

Collaborated closely with a graphic designer on GUI implementation and product-detail presentation.

Supported customer-facing digital systems that contributed to sustained business growth, including **10% year-over-year revenue growth for four consecutive years**.

Software Developer

Database Marketing Group — Irvine, CA | September 2019 to December 2019

Developed Angular 8 and ASP.NET Core Web API applications used by sales teams to generate automated reports and sales proposals from customer ordering data.

Worked on a Cordova + Angular application for an East Coast grocery store chain customer.

Maintained a legacy ASP.NET MVC 5 and AngularJS 1.x customer-facing application used by clients to order advertising campaigns.

Software Developer

Success Continuing Education — Newport Beach, CA | 2016 to 2018

Maintained a large-scale continuing-education website for finance-industry customers completing insurance continuing education requirements.

Supported legacy ASP.NET WebForms applications while contributing to newer products built with ASP.NET MVC, Web API, AngularJS, and Angular.

EDUCATION

Bachelor of Science in Computer Science — California State University | 2021

Associate of Science in Computer Science — Saddleback College | 2019

ADDITIONAL KEYWORDS

Python, C++, Java, Node.js, Next.js, Bootstrap, jQuery, LINQ, ADO.NET, JSON, XML, cloud infrastructure, AI, communication skills, delegation, senior leadership, computer science, software engineering.

SELECTED PROJECTS

LLM Academy

Agronomist Studio

Static learning platform | Angular 21, signals, markdown rendering, quizzes, localStorage

Precision agriculture product | Blazor WebAssembly, TypeScript, microservices, GIS + weather integrations

- Built a free, self-paced learning platform for continuing education on working effectively and safely with large language models.
- Built a domain-focused dashboard for yield prediction, nutrient management, field intelligence, and map-driven farm analysis.
- Implemented a multi-course Angular 21 experience that loads markdown lessons and quizzes from versioned content manifests, with local progress persistence.
- Integrated CIMIS, NRCS SSURGO, WUCOLS, Open-Meteo, and Google Maps data to support California-specific irrigation and agronomy workflows.
- Kept deployment fully static and host-agnostic, combining syntax highlighting, Mermaid diagrams, and submodule-backed course content without a backend.
- Implemented AI-assisted natural language querying and service-oriented backend modules to turn complex agronomy data into actionable recommendations.

MVP-Finance

Local-first personal finance platform | .NET 10, Minimal APIs, EF Core, SQLite, Angular

- Designed an event-sourced ledger for cash, debt, and investment accounts with accurate balance history and transaction traceability.
- Built real-time financial planning features including spendable-now calculations, burn-rate tracking, and debt-payoff projections.
- Delivered the full product stack end to end, combining domain modeling, API design, and a modern SPA UI for interactive budgeting workflows.
